

Why Smartphones are Replacing Hardware Scanners

Smartphones, powered by Scandit's barcode scanning software, are becoming the de facto devices of choice for enterprise employees, from delivery drivers to retail associates to frontline workers. Find out why.

A Smarter Way to Operate

Lower costs

x3

Scandit barcode scanning is typically x3 lower cost than dedicated hardware scanners.

Boost productivity

34%

estimated efficiency savings from a large grocer by deploying one smart device for multiple operational tasks.

Greater agility

Meet evolving needs and demand with superior scalability from an app-based approach.

More flexibility

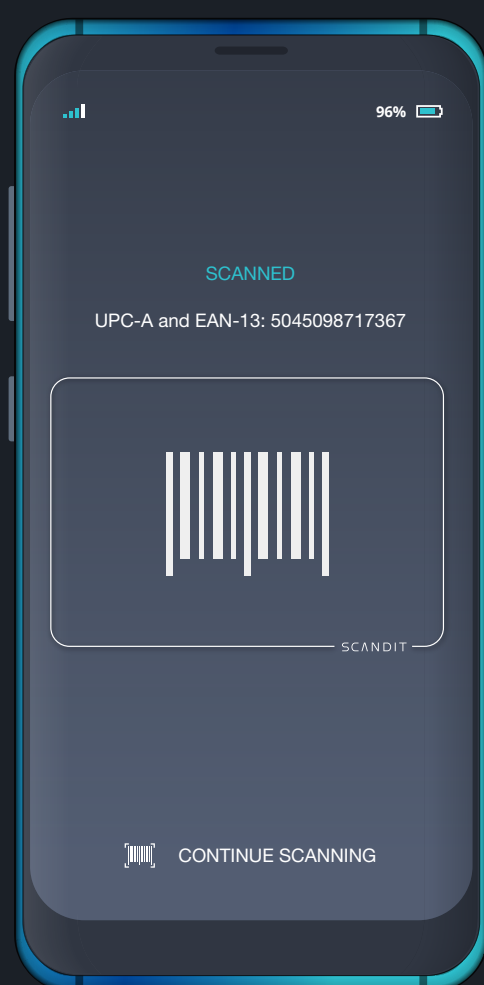

It's easy to add data capture and more into any IT environment, including native and web apps.

Enterprise technology without compromise
Scandit-powered mobile apps on smart devices unlock speed, simplicity and savings – while matching or even outperforming hardware scanners.

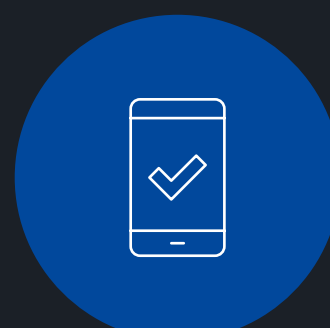

Smartphones Deliver Everything Enterprises Need

Battery life that can easily last any shift

12k+

scans on one charge
With Scandit on a rugged smartphone.

Tough enough to work anywhere
Rugged smart devices are designed for the toughest conditions.

- Drop and tumble proof
- Water and dust resistant
- Ultra-rugged with additional case

Familiar devices employees love to use
Do more with one intuitive and flexible device, selected and tailored to meet users' different needs.

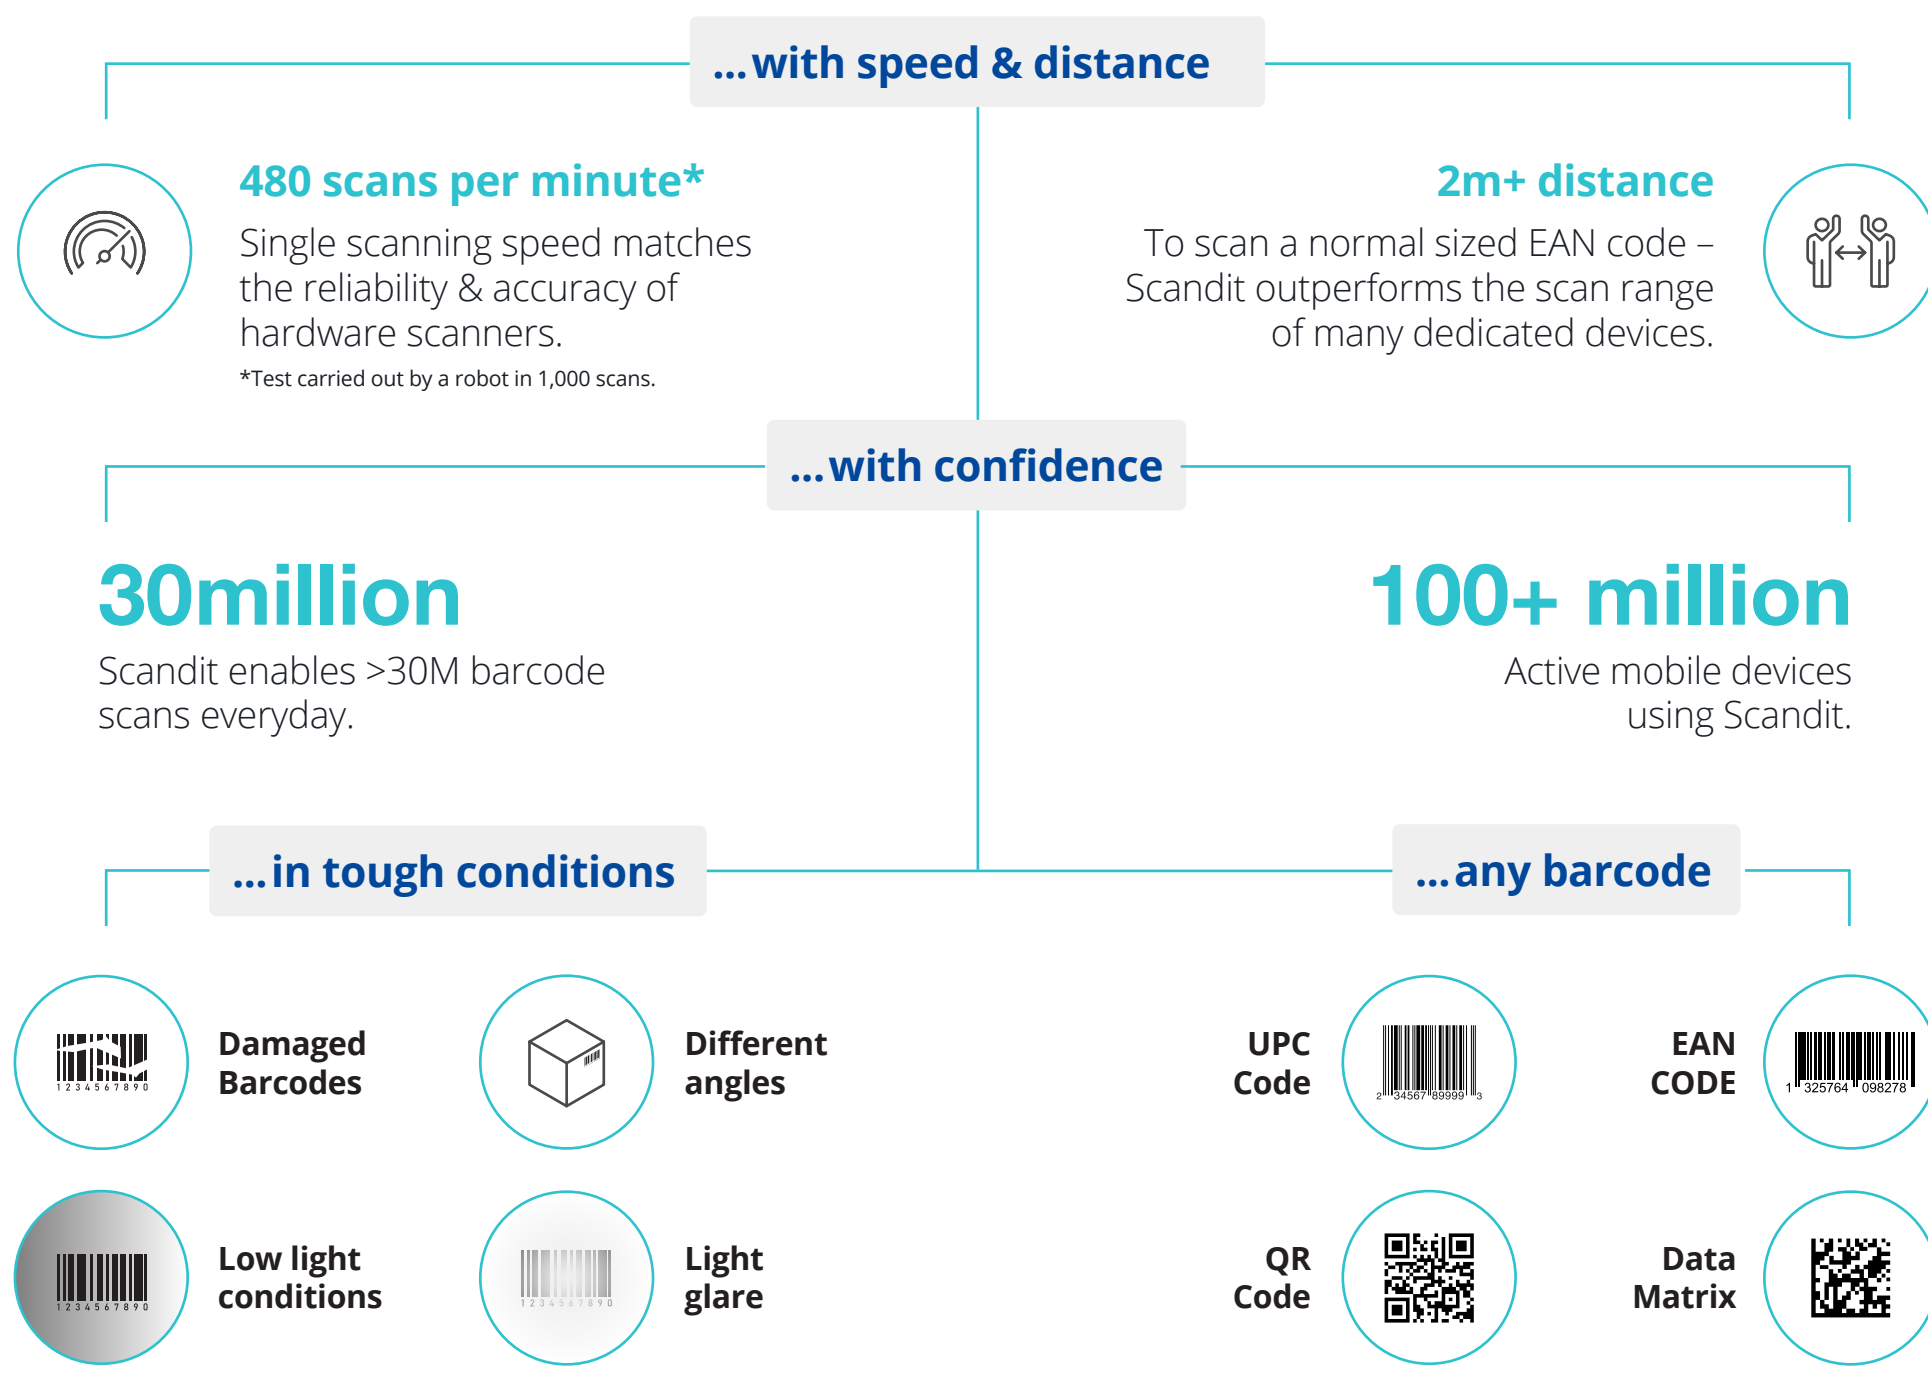

- Familiar and user friendly
- Lightweight to fit into a pocket
- Wide screens

"Barcode scanning is one of the top three most critical features businesses take into account when choosing a rugged device"

VDC Research

So What About Scan Performance?

With Scandit's enterprise-grade software you can scan...

Smartphones Help Improve and Innovate Workflows

More than just a replacement for laser scanners. Transform workflows to unlock new efficiencies by deploying barcode scanning, ID scanning and augmented reality on smart devices.

Continuous scanning mode scans high volumes without repetitive and tiring button pressing, capturing many barcodes in one sweep.

Capture multiple barcodes simultaneously for ultimate speed – while AR overlays help boost efficiency.

Scan ID documents to confirm age or check-in with any smart device.

So, is it time to replace hardware scanners?

Find out more about the benefits of switching to software scanning, including customer stories and expert insights.

GET STARTED

Scandit's award winning mobile computer vision software enables barcode scanning, text and object recognition for enterprise apps and delivers real-time insights through AR overlay.
