

5 Steps to Streamline Your Quick Commerce Operations

In the fast-paced world of quick commerce, speed, and efficiency are essential for delivery success. Here are the 5 steps for streamlining your operations and improving delivery speed and accuracy with Scandit Smart Data Capture.

Driver Registration Made Easy with ID Scanning

Simplify and accelerate the driver registration process, reducing the time and resources required to onboard drivers. With Scandit's ID scanning, potential employees can quickly and accurately capture their driver identity information using a smart device.

SOLUTION

ID Scanning – Native or Web SDK, which can be implemented on a web app. So drivers can easily log in.

2000+
Extra Security – ID scanning covering 2000+ documents.

Effortless Order Picking With SparkScan

Efficient in-store picking is critical for fulfilling online orders quickly and accurately in dark stores. It also reduces the chance of missing products and unhappy customers. Scandit's Smart Data Capture technology streamlines the picking process and ensures the right products are picked and packed, eliminating errors and improving the speed and accuracy of order fulfillment.

SOLUTION

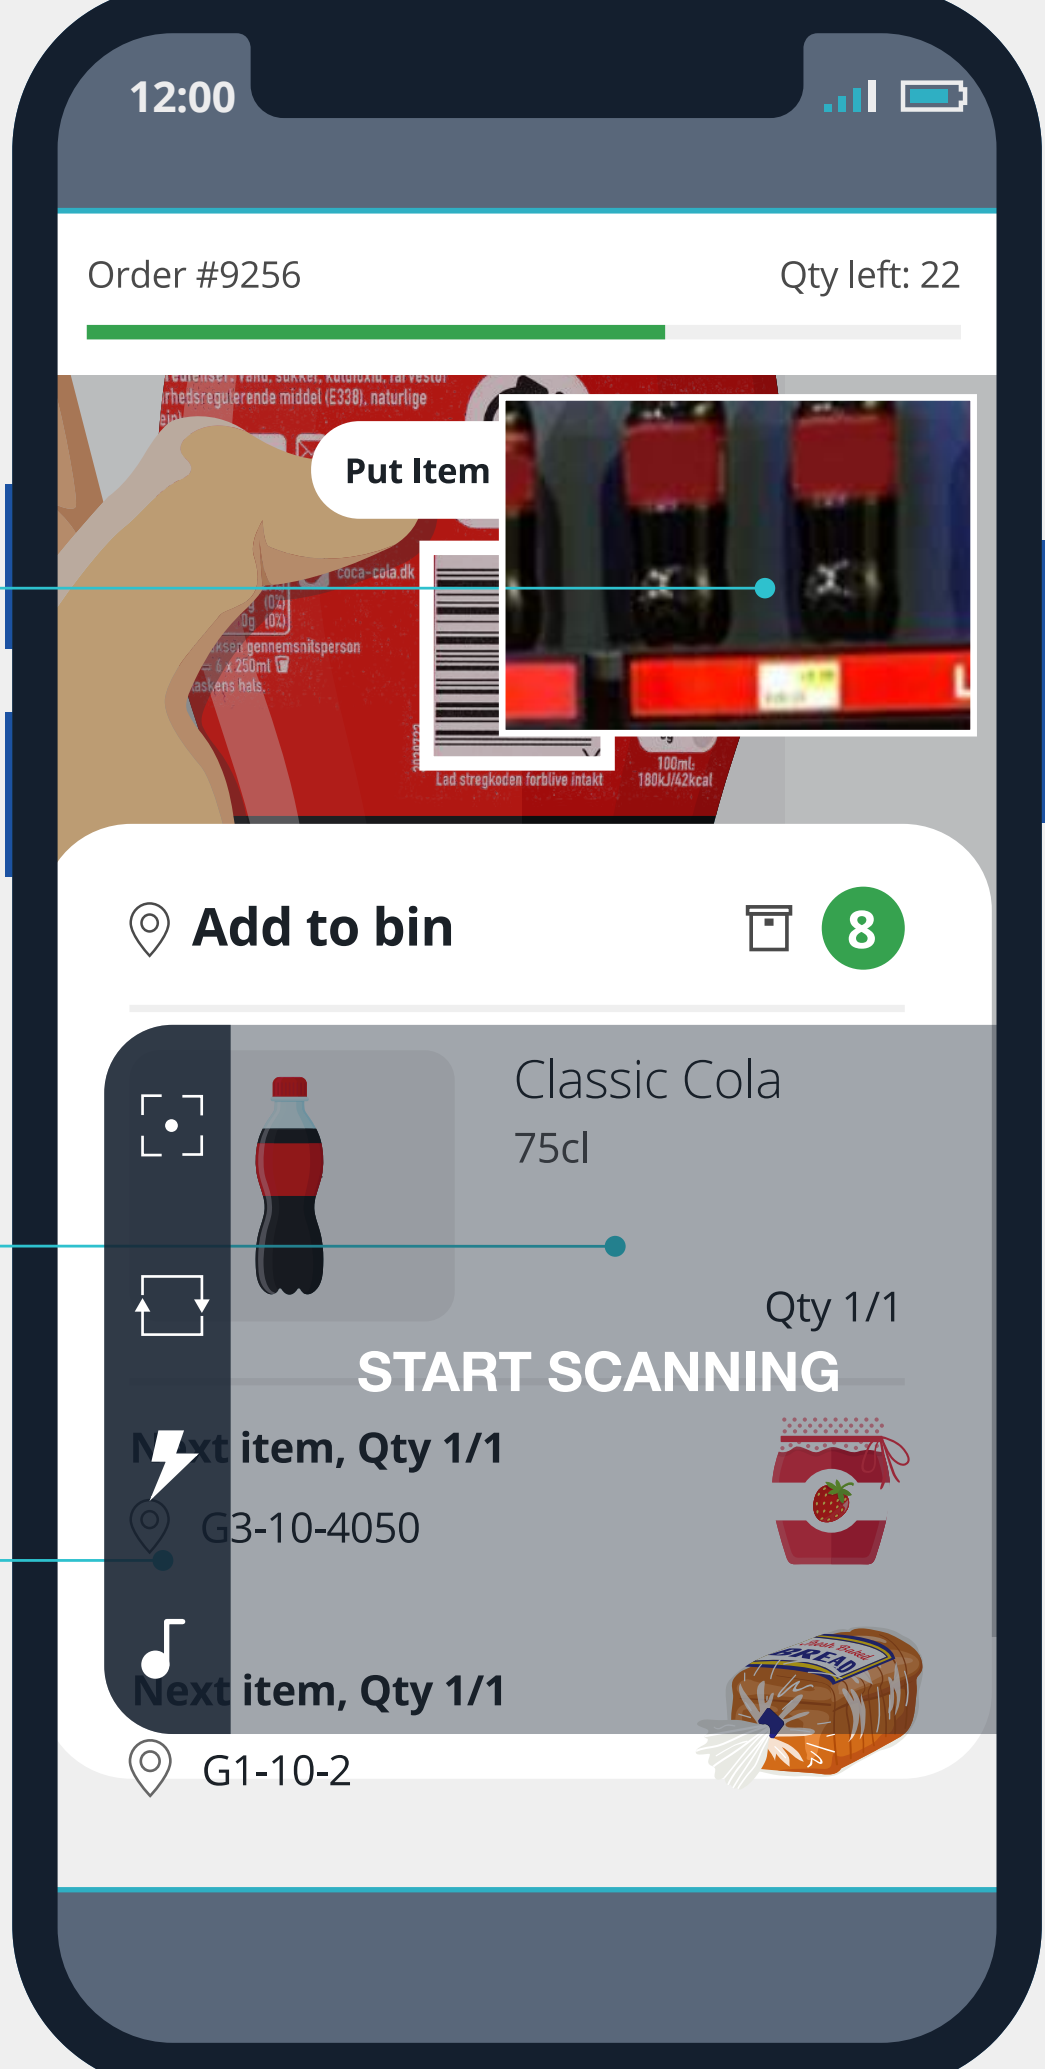

SparkScan – SparkScan fits over an existing application with just a few lines of code – providing almost instant access to Scandit functionality.

SparkScan fits on top of any application

Finding The Right Delivery With Augmented Reality

Locating the right package is crucial for ensuring fast and accurate deliveries. Thanks to augmented reality and smart scanning technology, delivery drivers are directed to the right order for each delivery.

SOLUTION

MatrixScan and augmented reality – MatrixScan scans multiple barcodes at once and augmented reality highlights the right products on-screen.

Reliable Age-Verification at the Front Door

Delivery drivers can easily search and find the right delivery while ID scanning technology can be used to verify the customer's age. This ensures compliance in countries where age verification is a legal requirement for alcohol deliveries.

SOLUTION

Age-Verified Delivery

European and Australian Driver Licenses

Our ID scanning software reads and correctly interprets the human readable text on the front of the license.

Passports and European ID Cards

Scandit can scan and parse the 'machine readable zone'.

North American Driver's Licenses and ID Cards

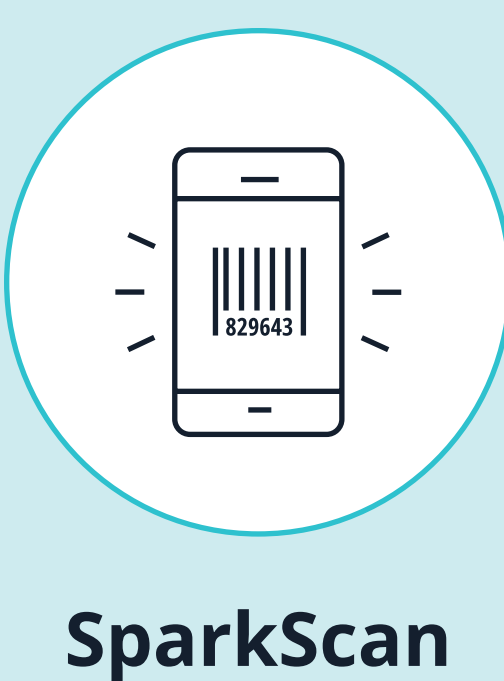

A smartphone enabled with Scandit Smart Data Capture reads the PDF417 barcode on the back or the human readable text on the front.

Fast Integration & Future-Proofing For Your App

You can combine all of these features into one app. Integrating Scandit into your existing delivery app has never been easier with our no-code options. And if you require any customizations or support, our team is always here to help.
